Unlike spiritual paths that arose from the ideas and inner experiences of lone, isolated human beings, the path presented by near-death experiences is emerging as a direct, grassroots revelation that millions of people from all over the world are receiving and sharing. If we explore this newly emerging path deeply enough, we discover that all religions, philosophies, and cultures are honored; that science and spirituality are celebrated; that both the human and spiritual side of our natures are cherished and embraced. In short, near-death experiences present us with a universal, all-inclusive, perfectly integrated spiritual path that revolves around three core truths:

1. We are all one
2. Love is the essence of life
3. We are here, in this world, to become perfect embodiments of the Divine

"Loving others allows us to become embodiments of the Divine in this world and wake up from the dream of life in a balanced, healthy, integrated way."

"The more deeply we realize the world is a dream, three things happen: 1. We become less fearful; 2. We begin to master the laws of this world; 3. The more joyful and expansive our lives become."
